Open to New Opportunities

UI/UX Designer & AI Engineer with 11+ shipped projects, hackathon semifinalist, and a unique Biology-to-AI journey. Looking for my next role.

UI/UX Designer

AI Engineer

Full-Stack (React/Next.js)

Mobile (React Native)

Langsa, Aceh · Indonesia · Remote OK

// WHAT I'M LOOKING FOR

Two Roles. One Hybrid Skillset.

UI/UX Designer

User-centric design from research to production

Design systems, component libraries, prototyping, and usability testing. I design with engineers in mind — design tokens, Figma Auto Layout, and accessibility (WCAG 2.1) baked in.

Figma

Design System

User Research

Prototyping

Journey Mapping

A/B Testing

AI Engineer

Production AI — from prompt to deployment

LLM integration (Gemini, OpenAI, Claude), RAG pipelines, MLOps with MLflow + GitHub Actions, on-device ML with TensorFlow Lite. I ship AI features that users actually use.

Gemini API

LangChain

TensorFlow

MLflow

RAG

// TRACK RECORD

What I've Actually Shipped

01

Semifinalist · PIDI Digdaya BI Hackathon 2026

Top 20 nationally with TRADIX — an AI stock trading platform integrating 10 AI providers. Live at tradix-app.pages.dev.

02

11+ Projects Shipped to Production

AI platforms, mobile ML apps, MLOps pipelines, design systems — all with public GitHub repos for verification.

03

18 Dicoding Academy Certificates + BDT

Machine Learning, Frontend, Backend, Cloud, Mobile Development — verified competencies across the full stack.

04

Build with Gemini XPRIZE 2026 Participant

Built PathMentor AI — an adaptive tutor for high-school students powered by Gemini 2.0 Flash with a Socratic approach.

// AVAILABILITY

When & Where

	Location	Langsa, Aceh, Indonesia
	Remote Work	✓ Open to remote (any timezone)
	Relocation	✓ Willing to relocate for the right role
	Employment	Full-time · Contract · Freelance
	Start Date	Immediately (within 2 weeks notice)
	Timezone	GMT+7 (WIB) · Flexible for overlap
	Language	Indonesian (Native)

// WHY ME?

The Hybrid Advantage

Most candidates are either designers OR engineers. I'm both — plus a Biology M.Sc. that gives me an edge in health-tech, bio-AI, and data-heavy domains.

Designer's Eye

Design systems, micro-interactions, accessibility — UX-first thinking.

Engineer's Mind

TypeScript, Prisma, MLOps — production-grade code that scales.

Domain Edge

Biology M.Sc. → computational biology, bioinformatics, health-tech AI.

Proven Shipping

11+ projects shipped, hackathon semifinalist, real users on live URLs.
