

// ABOUT ME • 2026

Hi, I'm Febri Rizki

UI/UX Designer & AI Engineer blending design intuition with production-grade AI systems. Biology background turned tech — a unique edge for AI in life sciences & healthcare.

// MY JOURNEY

From Biology to AI Engineering

I started with a B.Sc. in Biology from Universitas Syiah Kuala (2018), then completed my M.Sc. at Universitas Sumatera Utara (2024).

But during my Master's, I discovered something fascinating: **my biology background was a strategic advantage** for building AI — understanding complex systems, scientific data analysis, and analytical thinking translated directly into computational biology, bioinformatics, and AI model development.

Now I build end-to-end digital products combining UI/UX design and production AI — from design systems and component libraries to MLOps pipelines and AI-powered mobile apps.

// WHAT I DO

Building **11+** Projects End-to-End

Real products shipped across AI platforms, mobile ML apps, MLOps pipelines, and design systems. Not just tutorials — production-ready code with live deployments.

// EDUCATION

Academic Background

Biology background that became a competitive edge for AI in life sciences & healthcare domains.

M.Sc. in Biology

Universitas Sumatera Utara (USU)

2022 — 2024 · Medan, Indonesia

Deep understanding of complex systems, scientific data analysis, and analytical thinking — directly applicable to computational biology, bioinformatics, and AI model development in life sciences.

B.Sc. in Biology

Universitas Syiah Kuala (Unsyiah)

2014 — 2018 · Banda Aceh, Indonesia

Strong foundation in scientific method, statistics, and data processing that underpins my transition to data science and AI engineering.

Let's Connect

Open to collaborations, freelance projects, and full-time roles in UI/UX Design & AI Engineering. Let's build something impactful together.
