PROFESSIONAL SUMMARY

UI/UX Designer and AI Engineer with an academic background in Science (B.Sc. & M.Sc. in Biology) that proves to be a strategic advantage in developing AI solutions — particularly for domains requiring understanding of complex systems, data analysis, and analytical thinking patterns. Holds M.Sc. from Universitas Sumatera Utara (2024) & B.Sc. from Universitas Syiah Kuala (2018) with hands-on experience building 10+ end-to-end digital products spanning user research, UI/UX design, and production-grade AI model integration. Semifinalist at the PIDI Digdaya Bank Indonesia Hackathon 2026. Committed to delivering intuitive user experiences backed by reliable, scalable AI systems.

WORK EXPERIENCE

UI/UX Designer & AI Engineer (Hybrid Role)

[Current Company Name] | [Start Year] - Present | [City], Indonesia

- Led end-to-end design and AI integration for digital platforms, combining UX research, prototyping, and machine learning model deployment.
- Built a component-based design system that improved visual consistency by 30% and accelerated frontend development cycles.
- Implemented Google Gemini API integration for AI tutor features and smart assistants, delivering personalized experiences for 1,000+ users.
- Conducted iterative usability testing that reduced user friction by 25% and increased task completion rate by 40%.
- Collaborated cross-functionally (frontend, backend, ML engineers) to launch 6 production-ready AI products within a 12-month period.
- Built an MLOps pipeline (MLflow + GitHub Actions) for automated model retraining, reducing model drift by 50%.

PROJECT PORTFOLIO

Featured projects with public repository links for verification:

- TRADIX - AI-Powered Stock Trading Platform (Hackathon PIDI Digdaya BI 2026 Project)** | <https://github.com/hyperchainpro/TRADIX>
- HyperChain Pro - AI-Powered Design Platform with BranchBoard** | <https://github.com/hyperchainpro/hyperchainpro>
- PathMentor AI - Adaptive AI Tutor for High-School Students (Gemini XPRIZE 2026)** | <https://github.com/febririzki95/pathmentor-ai>
- DapurMind AI - AI-Powered Cooking Assistant** | <https://github.com/hyperchainpro/dapurmindai>
- CR AutoPilot - Automated ContentRewards Pipeline (34 Platforms)** | <https://github.com/hyperchainpro/cr-autopilot>
- Food Recognizer - Flutter ML App (2023 Food Categories)** | https://github.com/febririzki95/food_recognizer_ci_check
- Workflow-CI - Automated ML Model Retraining (MLOps)** | <https://github.com/febririzki95/Workflow-CI>
- NeuroPilot - AI Platform with Caddy Server & Neon DB** | <https://github.com/febririzki95/NeuroPilot>
- Eksperimen SML - ML Preprocessing Automation (Breast Cancer Dataset)** | https://github.com/febririzki95/Eksperimen_SML_Febri
- Hyperchain Landing - Integrated Digital Ecosystem** | <https://github.com/hyperchainpro/hyperchain-landing>
- HYP Convert - Multi-platform Document Converter (Expo/React Native)** | <https://github.com/hyperchainpro/hyp-convert>

EDUCATION

Master of Science (M.Si.) - Biology

Universitas Sumatera Utara (USU), Medan | 2022 - 2024

Academic background in biology provides strategic advantage for AI Engineering: deep understanding of complex systems, scientific data analysis, and analytical thinking patterns directly relevant for computational biology, bioinformatics, and AI model development in life sciences & healthcare domains.

Bachelor of Science (S.Si.) - Biology

Universitas Syiah Kuala (Unsyiah), Banda Aceh | 2014 - 2018

Strong foundation in scientific method, statistics, and data processing that underpins the career transition to data science and AI engineering.

SKILLS

UI/UX Designer Tech Stack: Figma, Adobe XD, Sketch, Adobe Photoshop, Adobe Illustrator, Design System & Tokens, Wireframing, Prototyping, Usability Testing, User Research, Journey Mapping, Persona Development, Information Architecture, A/B Testing, Neumorphic Design, Material Design, Mobile-First & Responsive Design, Accessibility (WCAG 2.1), Figma Auto Layout, Figma Variants, Micro-interactions

AI Engineer Tech Stack: Google Gemini API (gemini-2.0-flash), OpenAI API, Prompt Engineering, RAG (Retrieval-Augmented Generation), LangChain, TensorFlow, TensorFlow Lite, PyTorch, scikit-learn, MLflow, Model Deployment & Retraining, MLOps, Pandas, NumPy, Matplotlib, EDA, Feature Engineering, Computer Vision, Image Classification, Isolate Inference, Hugging Face

Frontend Development: React, Next.js 16, React Native (Expo), TypeScript, Tailwind CSS 4, shadcn/ui, Radix UI, Framer Motion, Zustand, Three.js, GSAP, MDX Editor

Backend & Database: Prisma ORM, PostgreSQL, Neon, Convex, Supabase, Node.js, REST API, Bcrypt Authentication, SQLite, Caddy Server

Cloud & DevOps: Vercel, Cloudflare Pages, GitHub Actions, Docker, CI/CD Pipeline, OpenNext, Wrangler, EAS Build, Vercel Postgres

Programming Languages: TypeScript, JavaScript, Python, Dart, PHP, SQL

CERTIFICATIONS

Dicoding Academy (18 course certificates)

- **Machine Learning & AI** — 4 certificates (ML for Beginners, Applied ML, ML Development, AI Integration)
- **Frontend & UI/UX** — 5 certificates (JS Programming Basics, Frontend Web Fundamentals, React, React Expert, etc.)
- **Backend & Cloud** — 5 certificates (Backend Fundamentals, AWS Cloud Practitioner, GCP Basics, Azure Fundamentals, Docker)
- **Mobile Development** — 4 certificates (Android Beginners, Android Fundamentals, Flutter, Multi-platform)

Big Data & Data Analytics Training (BDT) — 1 professional certificate

AWARDS

Semifinalist — PIDI Digdaya Bank Indonesia Hackathon 2026

Bank Indonesia | 2026 | National

Collaborated with a team to develop an innovative data- and AI-driven digital solution supporting Bank Indonesia's digital transformation agenda. Passed the preliminary selection round and ranked among the top 20 teams nationally out of hundreds of participating teams.

Participant — Build with Gemini XPRIZE 2026

Google | 2026 | Global

Developed PathMentor AI, an adaptive tutor for high-school students powered by Gemini 2.0 Flash with a Socratic learning approach.
